

SINCE 1993

WELCOME TO LINEPRO

WELCOME TO THE WORLD OF INPUT DEVICES

- Membrane Keypads
- Capacitive Touch Sense Panels
- Metal Keyboards

ABOUT US

EMS | Input Devices Manufacturer

Linepro started as local PCB design center in 1993, then gradually evolved into pioneer of input devices and then Printed electronics, this being possible of exceptional leadership line within us.

Today we thrive on cutting-edge manufacturing technology in 10,000 class clean rooms and access to experts in industry. We cater custom input devices to reputed companies world-wide!

Custom Flexible & PCB Based Membrane Keypads

Linepro's Membrane Keypads are found in varied applications. Our Keypads are attractive and user-friendly. They are designed to sustain the working environment whether it is question of hygiene maintenance or harsh conditions, we can provide suitable keypads to every sector!

Salient Features

- Integrated LEDs
- Key Embossing
- EMI Shielding
- Multi-color Graphic Overlays
- Waterproofing
- Hybrid Membrane Keypads
- Tactile, Non-Tactile Option
- Backlighting Option
- Connector Options
- Moisture Sealing
- Gloss Finish
- Fine Texture
- Chemical and UV Resistant
- PCB, Flexible Circuit based

PCB based Membrane Keypad

Flexible Membrane Keypads

Anti-vandal Metal Keyboards & Keypads

PC Compatible Metal Keyboards

Salient Features

- 65 keys metal keyboard with touchpad/ trackball
- Water, dust and vandal resistant
- Etching and inking lettering
- Can be cleaned with soapy water, disinfectant or other cleaning agents

Material

- Front plate: 304# Stainless steel
- Keycaps: 304# Stainless steel
- Touchpad: 304# Stainless steel
- Backplate: Aluminium Alloy

Applications: Defence Machines, Public Utility Machines, Industrial platforms, Banking, Medical, Gas pumps, Gaming machine and Security equipment

Linepro's Custom Metal Industrial Stainless Steel Keyboard is high quality and durable metal keyboard, which is perfect for industrial and commercial applications. The switch elements are embedded inside the stainless steel or aluminium. This makes them completely protected from any external threats.

Metal Keypad for Fuel Dispensing Machine

Capacitive Touch Sense Panels

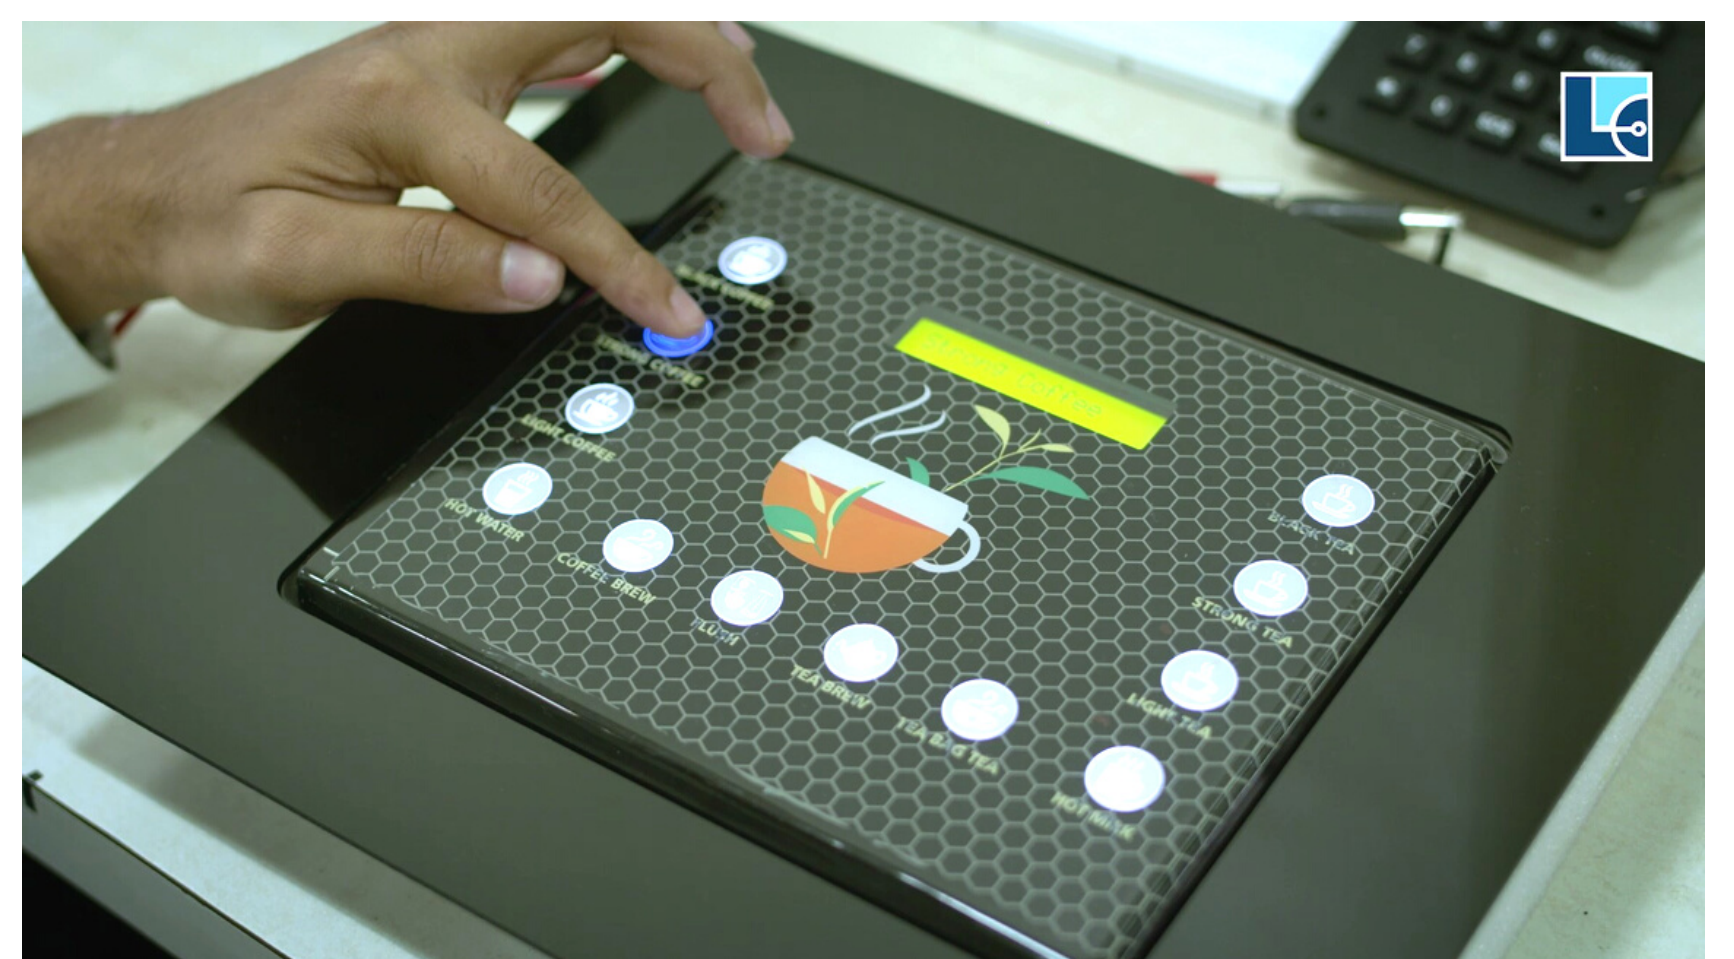

Capacitive Touch Panel for Security Lockers

Salient Features

- Elegant and rich appearance
- Easy to clean and maintain hygiene
- Multi color backlighting options using LEDs
- High durability as no mechanical parts are involved
- Haptic Feedback
- Best in class sensitivity
- Suitable for harsh working conditions

Linepro's Capacitive touch technology allows devices designed for complex and highly skilled operations to be controlled with intuitive finger movements. Our touch panels are tolerant to water, dirt and temperature variations. Backlighting on the glass provides capacitive sensing keyboards a beautiful and aesthetically appealing appearance with strong graphic clarity.

Touch Panel of Tea/ Coffee Dispensing machine

Applications: Public Kiosks, Industrial Control Panels, Home Automation switches, Consumer Electronics, Automobile interiors
